2.) Walk Out on Campus on the 6th at 12:50pm.

a.) Comments on the walk out from the senate

- i.) Catie: The protest is to bring to light the neglect of the administration and continuing sustainability. Feels the school should use less plastic and less paper used on campus. Such as bringing your own cup to Starbucks. Wants more attention should be brought to the school for the reusable products. MMC's Students are involved and is very student driven and is a good way for student engagement.
- ii.) Brenelle: Feels there is mis information about the ways MMC is sustainable. Such as the trash sorting that the college pays extra for more. The movement should have been in contact to other in SGA and Staff. Will meet with the movement to check their goals and be sure their goals are inline with SGA. Must keep connections with both sides of the movement and the administration.
- iii.) Julia: Is working to make the green roof project to talk about sustainability. She also believes that the these people should be contacting with the go green club and the social science department isn't making communication easy for their goals. Wants to walk out to make a statement.
- iv.) Shaelyn: Believes the walkout will make a networking moment for social science students and a good idea if carried out correctly. We should support the movement in a non bias way and give everyone an open ear and make a statement.

- v.) Billie: The non RSO's are feeling that there are not outlets to talk about their issues. Need to make a bridge for the people who don't have large connections. Will go in support of monitor.
  - vi.) Allison: We should back the walk out in order to protect freedom to protest.
  - vii.) Daja: This moment knows its facts and wants MMC to make better movements towards sustainability. The things being done now are not enough and do not meet the expectations of students.
- b.) Brenelle will update us on the thought and whether or not SGA will support the movement.
