

Finding the MAC Address for your device

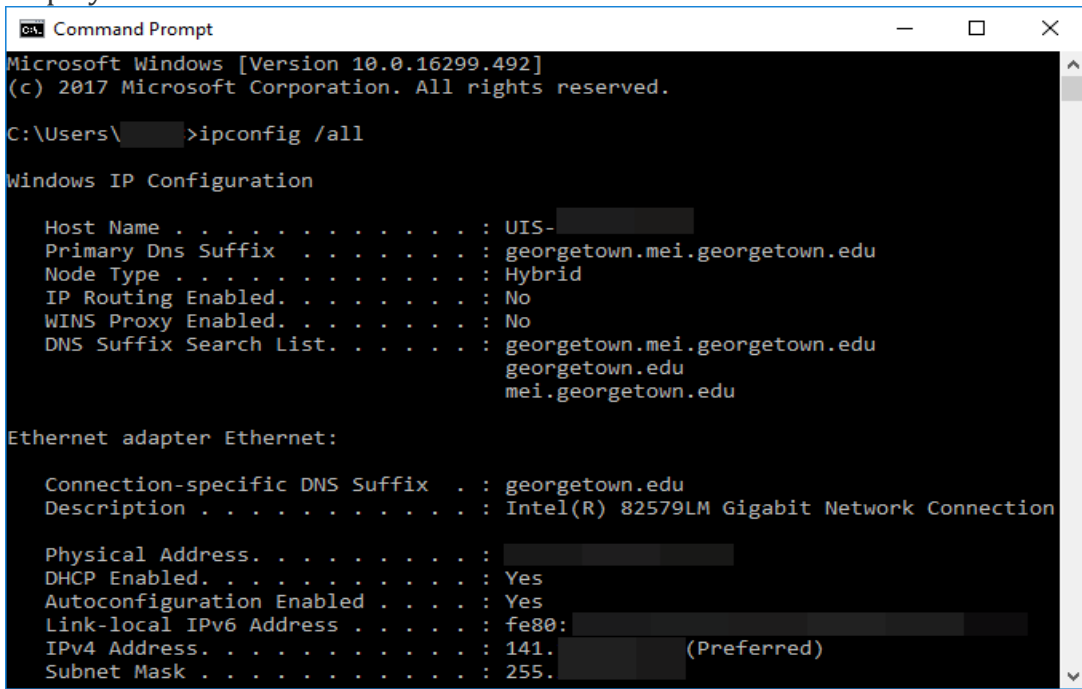

Windows Computer

1. Enter **cmd** in the search box at the bottom left-hand corner of your screen. Search results will be displayed automatically. Select **Command Prompt** from the results.

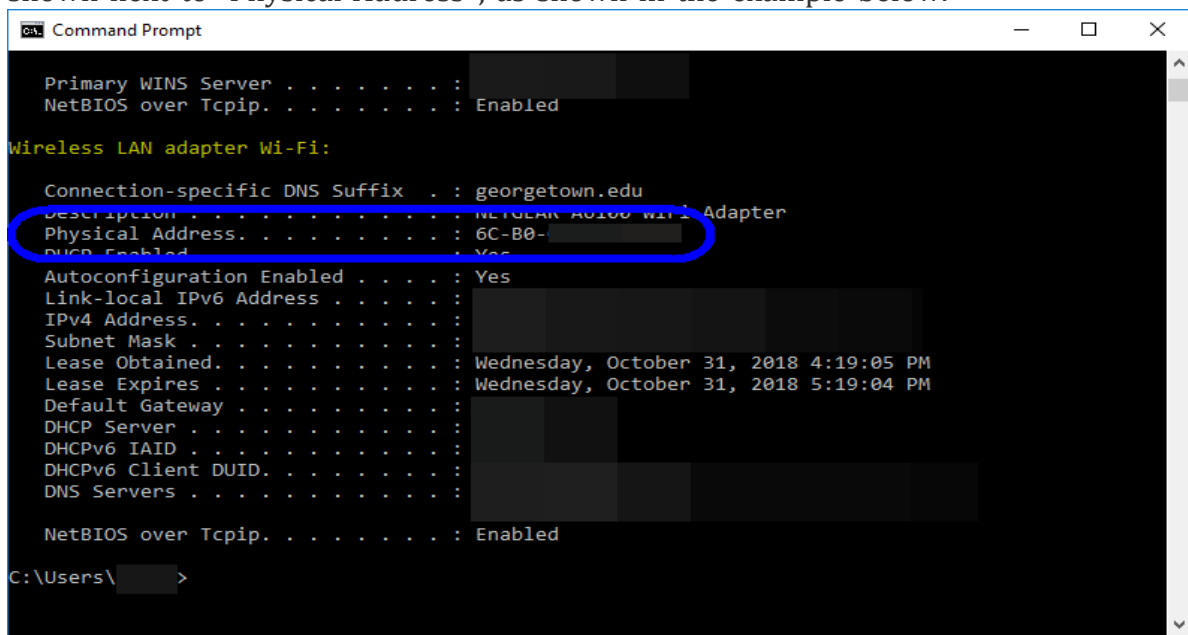

2. The Command Prompt window is displayed.
3. In the Command Prompt window, enter **ipconfig /all**. Information similar to the following will be displayed.

4. Navigate until you see the section “Wireless LAN adapter Wi-Fi”. The MAC Address will be shown next to “Physical Address”, as shown in the example below.

```
Command Prompt
